quanta_robot — WHEELED — Whole robot
built from link_dim_common + link_dim_wheeled and the STL files • marker = link origin • stepped red line = parent → child offset, split per axis

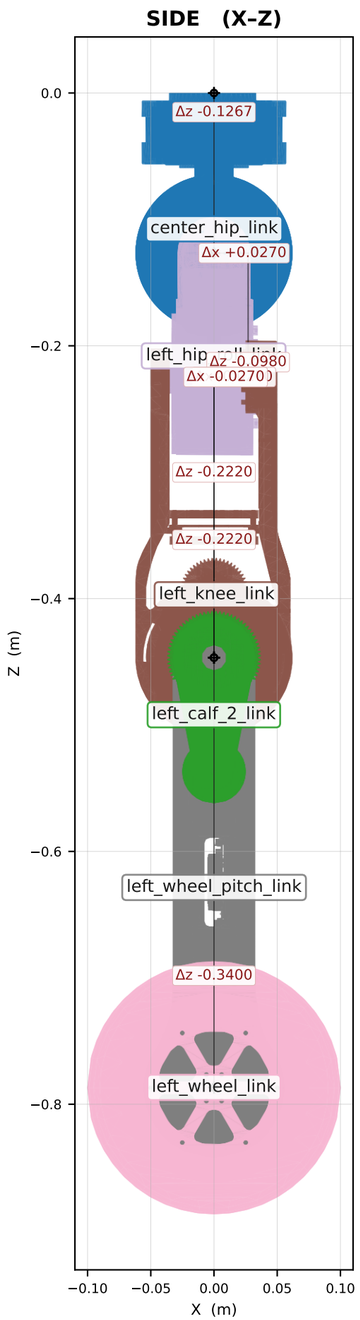

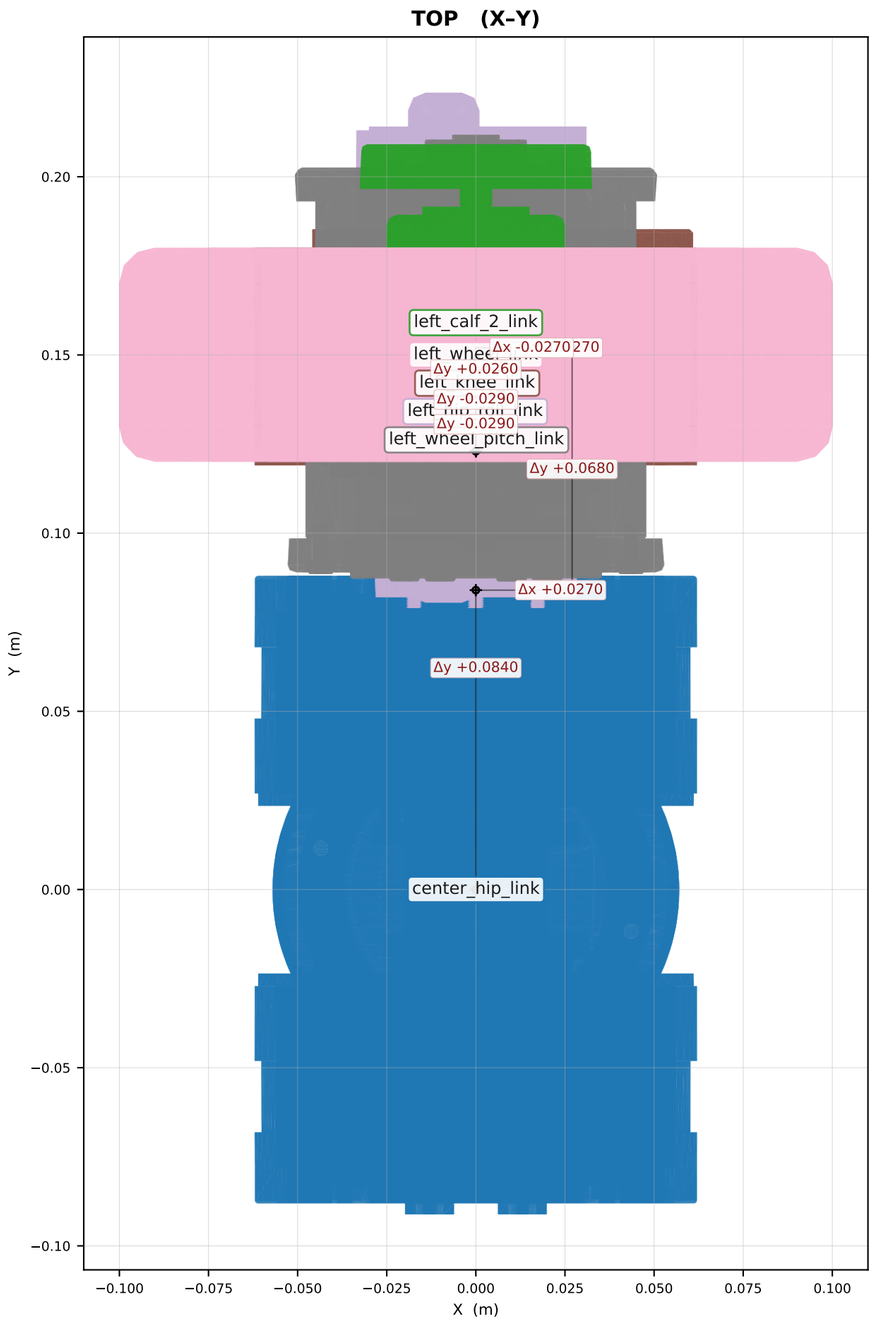

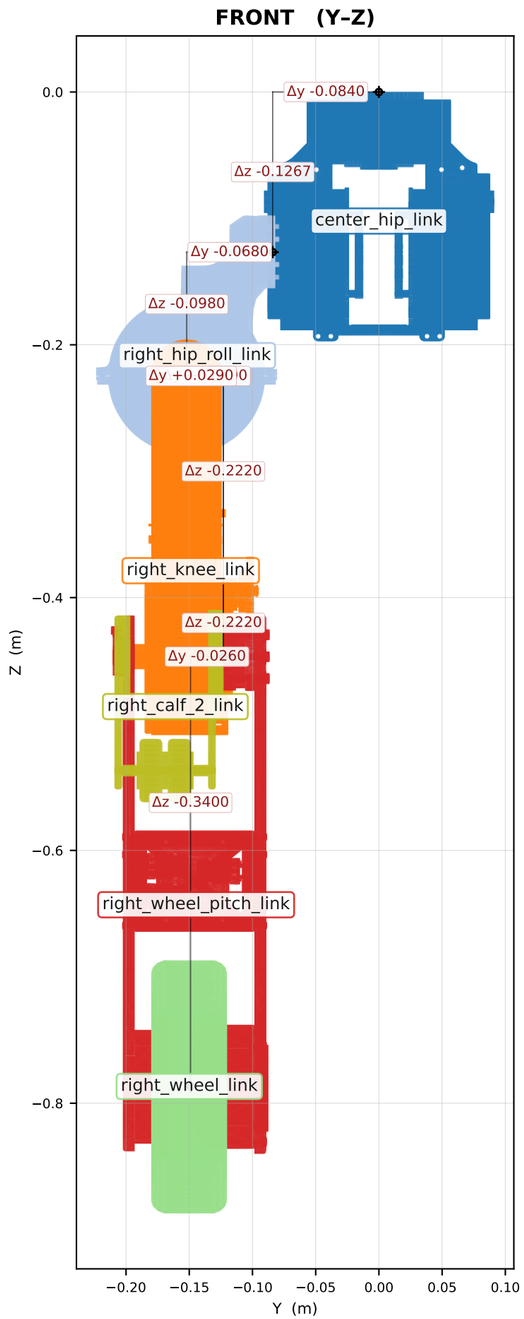

quanta_robot — WHEELED — Left leg
built from link_dim_common + link_dim_wheeled and the STL files • marker = link origin • stepped red line = parent → child offset, split per axis

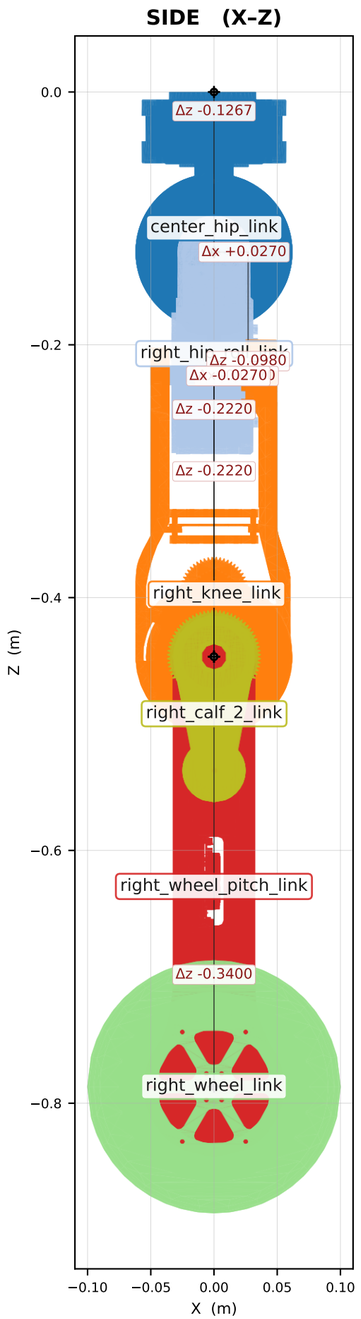

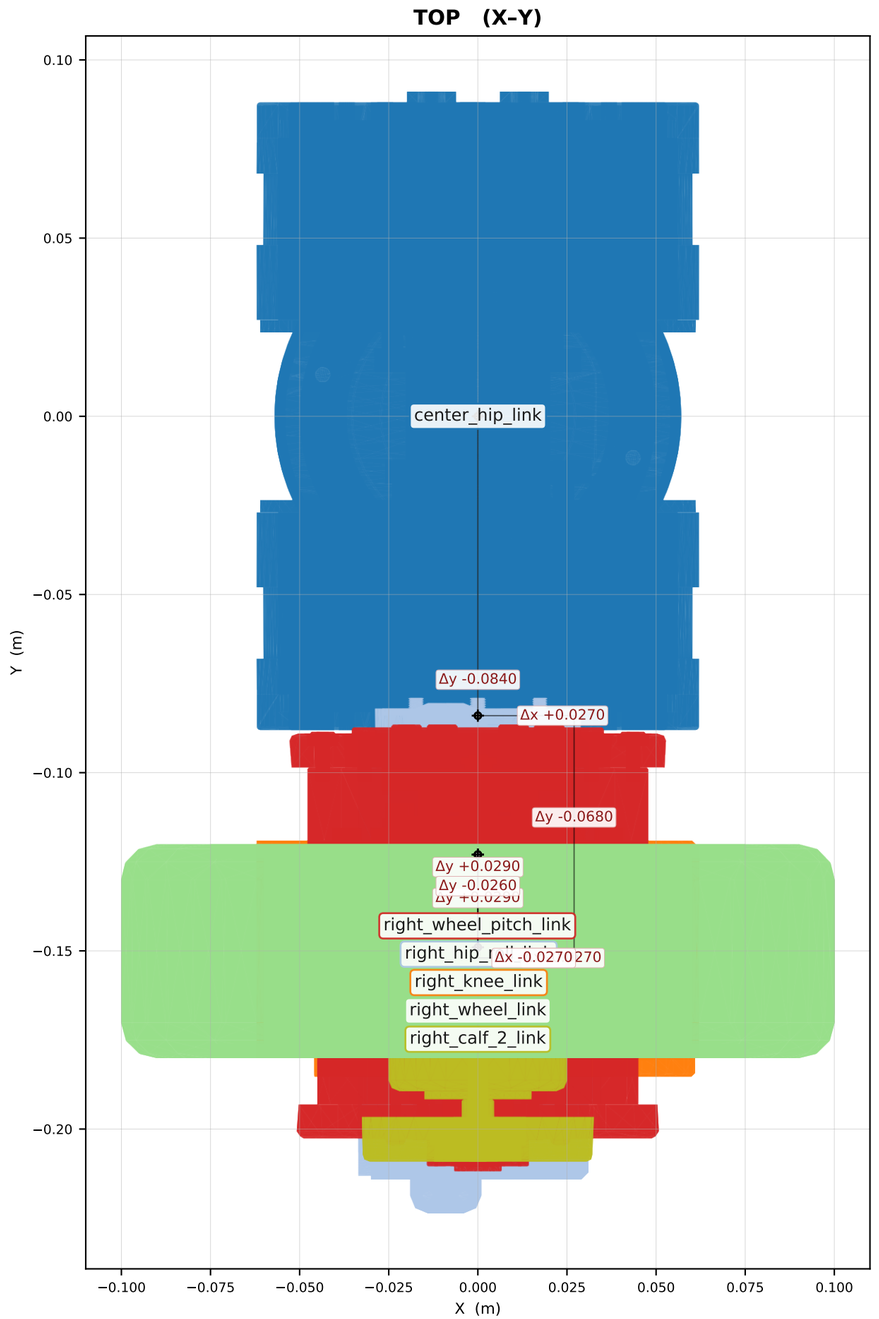

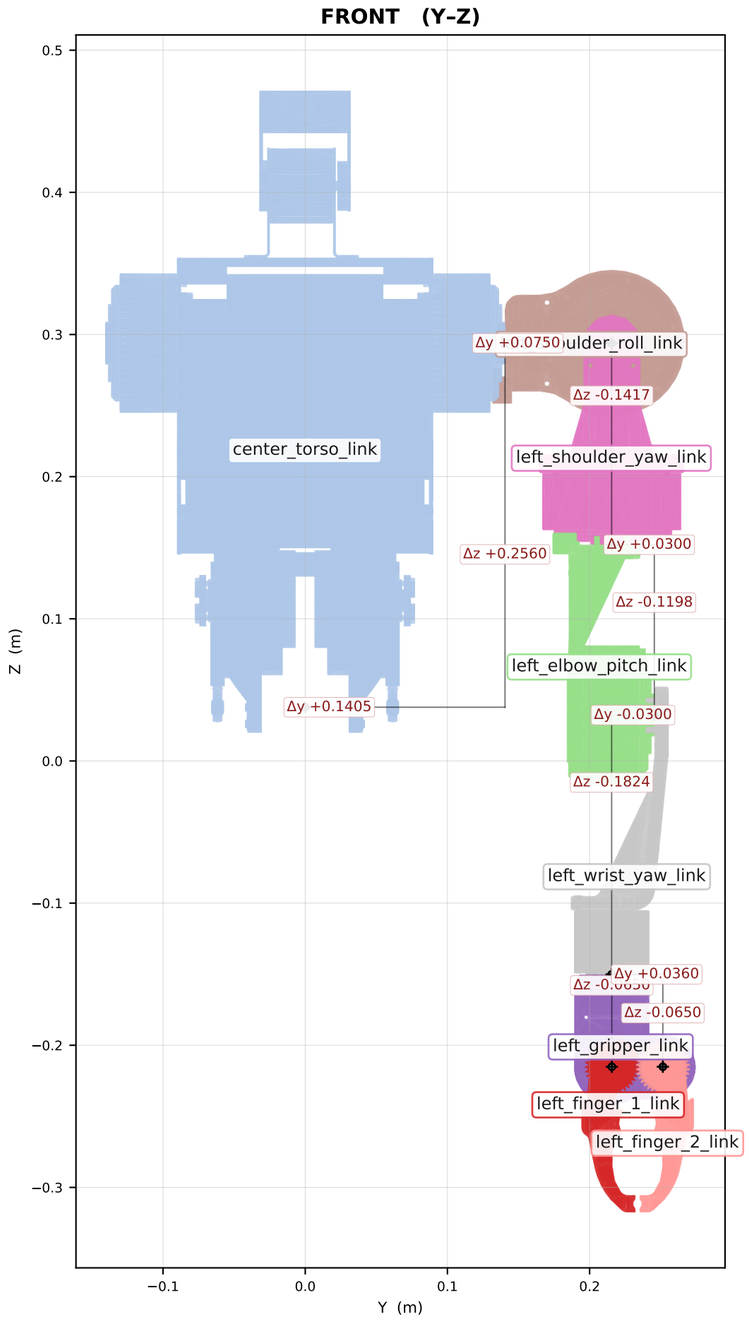

quanta_robot — WHEELED — Right leg
built from link_dim_common + link_dim_wheeled and the STL files • marker = link origin • stepped red line = parent → child offset, split per axis

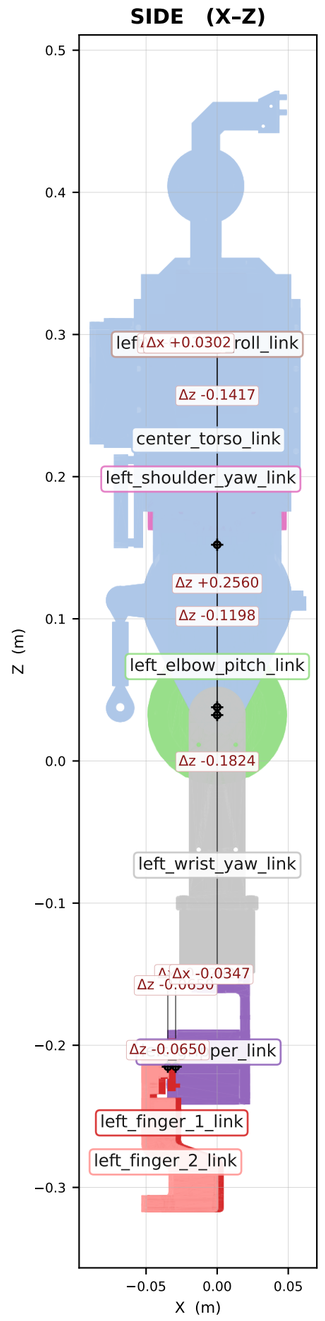

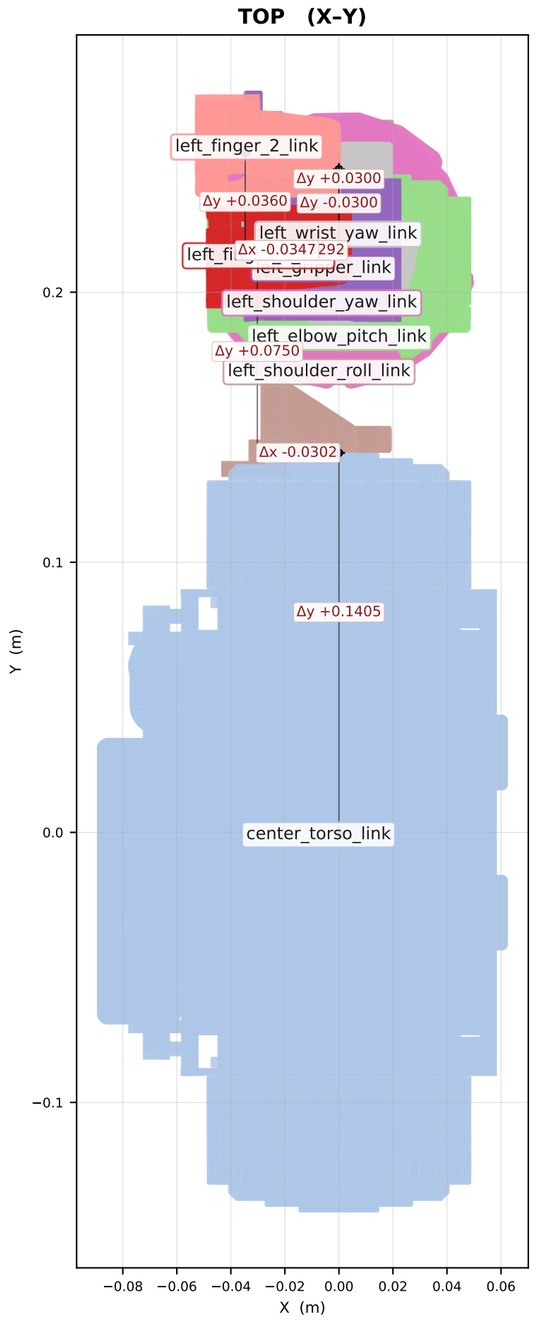

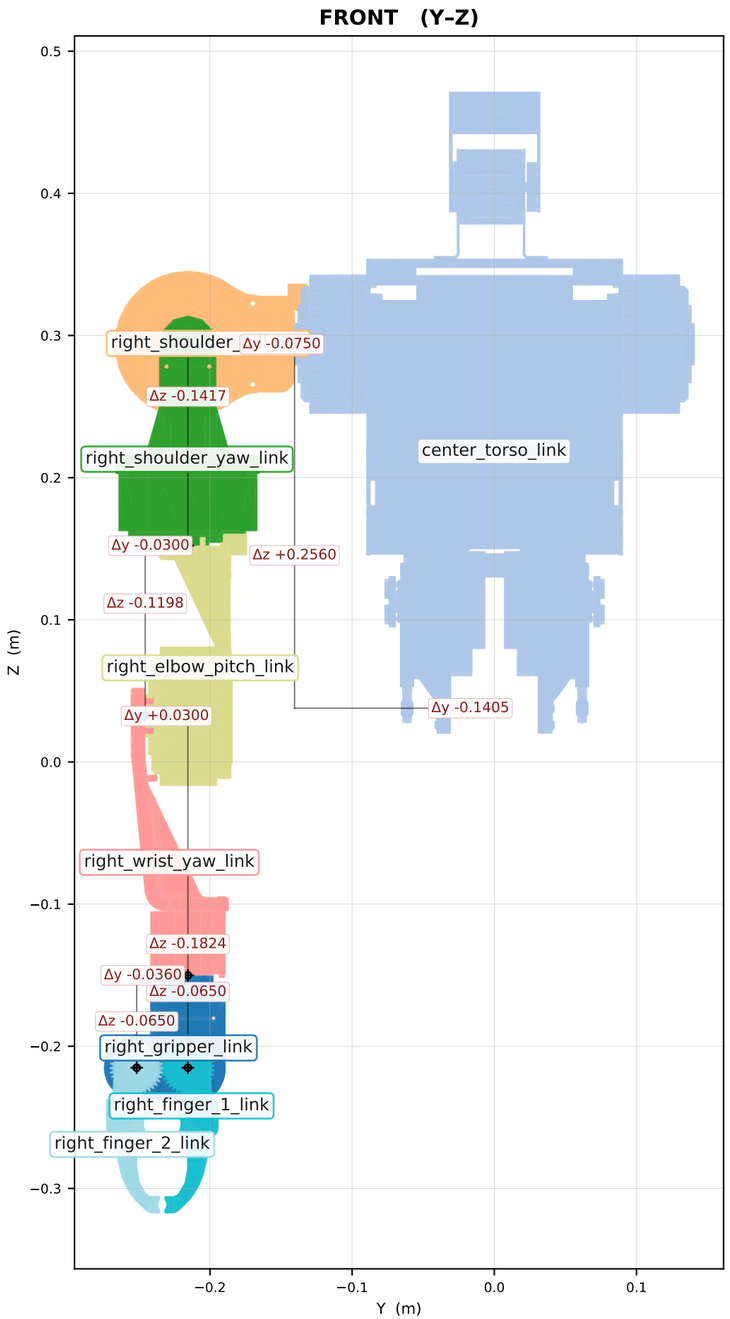

quanta_robot — WHEELED — Left arm
built from link_dim_common + link_dim_wheeled and the STL files • marker = link origin • stepped red line = parent → child offset, split per axis

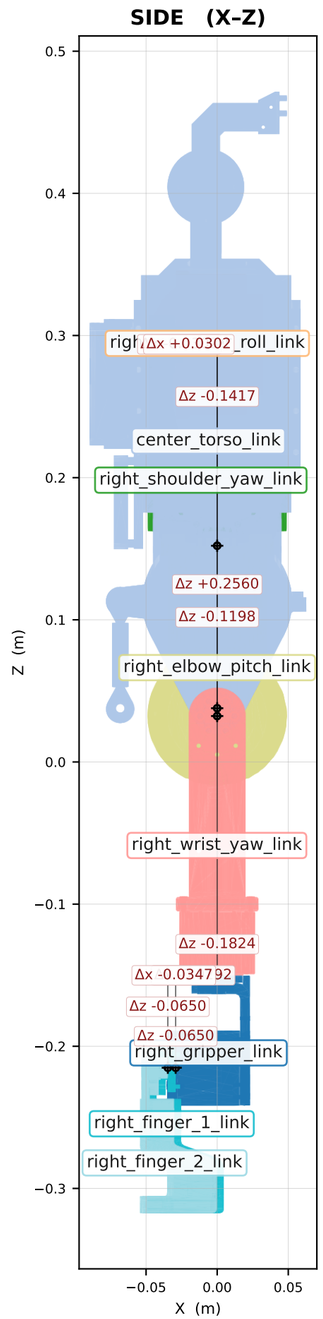

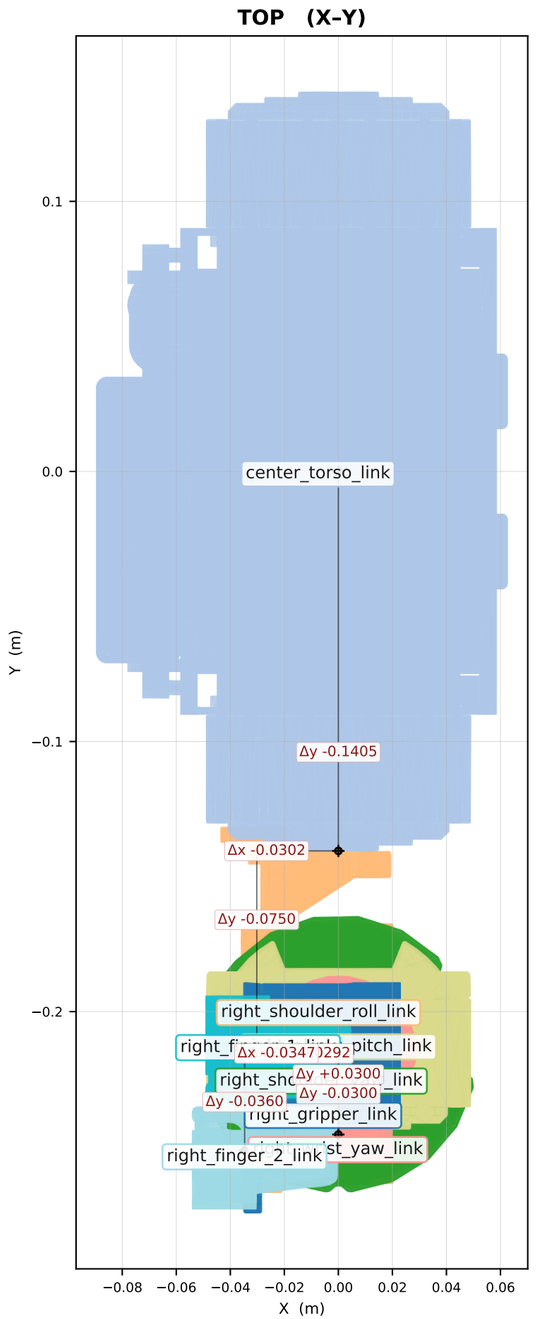

quanta_robot — WHEELED — Right arm
built from link_dim_common + link_dim_wheeled and the STL files • marker = link origin • stepped red line = parent → child offset, split per axis

quanta_robot — WHEELED — Torso / waist
built from link_dim_common + link_dim_wheeled and the STL files • marker = link origin • stepped red line = parent → child offset, split per axis
